

Versatile fixing brace for wood posts, stakes & tutors

« **Fix-E-Z** »

What does it bring ?

- The versatile and efficient fixing solution that really lasts
- Facilitates the work of installing wooden stakes and posts for beginners and professionals,
- Improves the lifespan and appearance of jobsites

What is the principle ?

- Use of a single fixing element, adaptable to all cases of application, by simple bending by hand and whose implementation is done using only two very common tools: Hammer & Screwdriver

What's the point ?

- Versatile fixing brace for wood post & fence

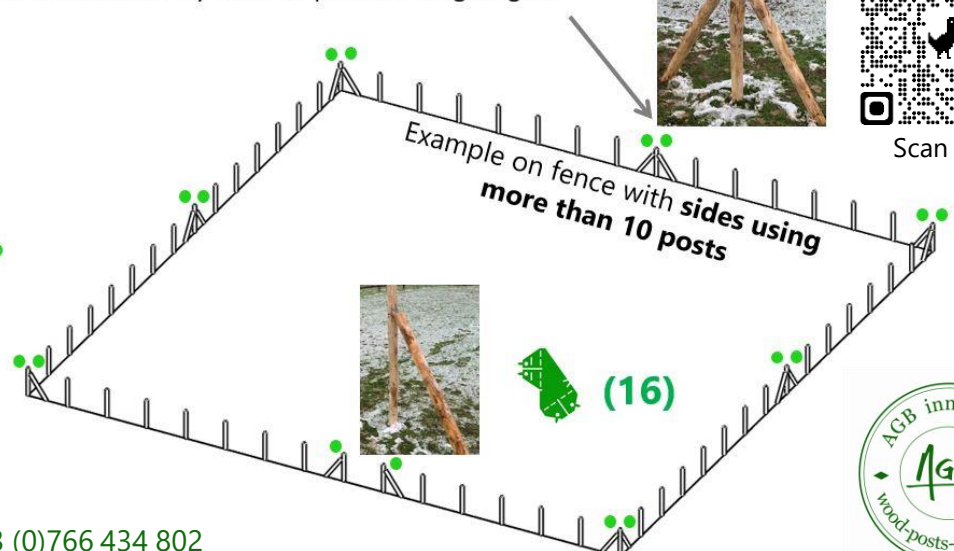

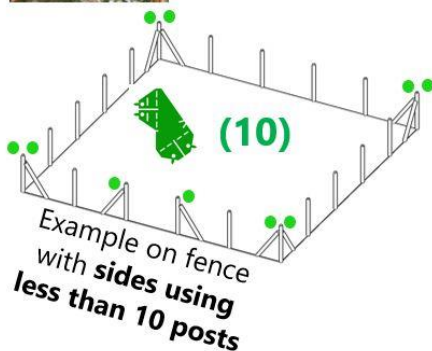

What are the benefits for users?

- **EASE** Folding by hand with integrated wrench - "3rd hand" function - Hammer & Screwdriver only
- **PRACTICALITY** 1 single fixing and 1 single model of post for all cases of application
- **SAFETY** No tricky angle sawing when clamped at 35° – Reduces risk of injury
- **DURABILITY** 1.5mm galvanized steel with integrated clips for excellent durability
- **QUALITY** Reduced risk of splitting the wood – Stronger assembly – Better final appearance

SIMPLE – VERSATILE - LONGLIFE

Bracing elements to be considered (example of a fence)

2 posts placed as brace using 2 "Fix-E-Z" connectors in each corner, at each opening, as well as all every 10 to 12 posts on long lengths
